Altınbaş, B. C., Çalık, K. Y., Erdöl, E. K., Kırkbir, İ. B., Güner, S. G., Tezel, M., Özmen, G. Ç., Erdöl, H., & Bulut, H. K. (2025). The effect of simulation-based laboratory training on undergraduate nursing students' clinical skill, satisfaction, and self-confidence. *BMC Nursing*, 24(1), 1322. <https://doi.org/10.1186/s12912-025-04004-w>

- One group received standard theoretical instruction, and another group had additional training in a simulation lab.
- Pre-intervention skill scores were comparable between groups ($p > 0.05$). The intervention group showed significantly higher clinical skill scores at one week and one month ($p < 0.001$). Satisfaction ($p = 0.560$) and self-confidence ($p = 0.296$) did not differ significantly between groups.

Ghezzi JFSA, Higa EFR, Lemes MA, Marin MJS. Strategies of active learning methodologies in nursing education: an integrative literature review. *Rev Bras Enferm*. 2021 Mar 24;74(1):e20200130. English, Portuguese. doi: 10.1590/0034-7167-2020-0130. PMID: 33787786.

- Review of different teaching strategies.
